The Division of Science Resources Statistics (SRS) fulfills the legislative mandate of the National Science Foundation Act to ...

provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources and to provide a source of information for policy formulation by other agencies of the Federal Government...

To carry out this mandate, SRS designs, supports, and directs periodic surveys as well as a variety of other data collections and research projects. These surveys yield the materials for SRS staff to compile, analyze, and disseminate quantitative information about domestic and international resources devoted to science, engineering, and technology.

If you have any comments or suggestions about this or any other SRS product or report, we would like to hear from you. Please direct your comments to:

ACKNOWLEDGMENTS

This publication was prepared by Kelly H. Kang, Project Officer for the Survey of Doctorate Recipients, Science and Engineering Human Resources Statistics Program (HRS) of the National Science Foundation's Division of Science Resources Statistics (SRS), under the overall direction of Mary J. Golladay, Program Director, HRS. Further guidance and review was provided by Mary J. Frase, Deputy Director, SRS; Ronald S. Fecso, Chief Statistician, SRS; and Lynda T. Carlson, Division Director.

David Edson of Mathematica Policy Research (MPR) provided oversight in the production and a detail review

of the tables. Francis Fefegula provided valuable assistance in the final table preparation. Tanya R. Gore and Rolfe Larson of the Information and Technology Services Program (ITSP) of SRS provided editing, processing, and final composition for this report. John R. Gawalt, Program Director of the ITSP, and his Web team handled electronic publication.

Census Bureau collected and processed the 1999 survey data for NSF. Census Bureau team staff who worked on this project were LaTerri Bynum, David Pysh, Susan Henn, Gary Curzi and John Nelson.

SECTION I. GENERAL NOTES

This report presents data on the demographic and employment characteristics of the nation's doctoral sciences and engineers. The data were developed as part of the Doctorate Data Project.¹ The goal of the 1999 Survey of Doctorate Recipients (SDR) is to provide policymakers and researchers with high-quality data and analyses for making informed decisions related to the educational achievement and career patterns of the nation's doctoral sciences and engineers. Current information on the supply and utilization of doctoral personnel in science and engineering reflects the results of SDR, the 14th in a biennial series. The population of the 1999 survey includes persons under the age of 76 who hold doctorates in science or engineering from U.S. institutions.

The SDR is a longitudinal demographic survey of science and engineering doctorate holders conducted biennially for the National Science Foundation (NSF) and for other Federal agencies (current and past sponsors included NIH and DOE) since 1973. The Technical Notes in Section II contain information on survey methodology, coverage, concepts, definitions, and sampling errors.

Various changes made in the 1999 data tables are also noted in the Technical Notes.

The detailed statistical tables in Section III provide information on the number and median salaries of scientists and engineers by field of degree and occupation; for demographic characteristics such as gender, race/ethnicity, and citizenship; and employment-related characteristics such as occupation, sector of employment, median annual salary, and various labor force rates.

For further information on the survey or the availability of data on Science and Engineering doctorates, please go to <http://www.nsf.gov/sbe/srs/cdse/start.htm> or contact:

¹The Doctorate Data Project consists of the Survey of Doctorate Recipients, a biennial survey conducted since 1973, and the Survey of Earned Doctorates, an annual census of research doctorates awarded since 1920, which forms the Doctorate Records File.

SECTION II. TECHNICAL NOTES

The data on doctoral sciences and engineers contained in this report come from the 1999 Survey of Doctorate Recipients (SDR),¹ which is a longitudinal panel survey of individuals who have received their doctorates in the sciences or engineering (S&E). Since the 1970s, this study has been conducted every two years for the National Science Foundation (NSF) and other federal sponsors.²

The U.S. Census Bureau conducted the survey for the NSF in 1999. Data collected in the SDR are part of the Sciences and Engineers Statistical Data System (SESTAT), surveys that are sponsored and maintained by NSF. Additional data on education and demographic information in the SDR come from the Survey of Earned Doctorates (SED), an ongoing annual census of research doctorates earned in the United States since 1920, which forms the Doctorate Records File (DRF).

THE SAMPLING FRAME AND TARGET POPULATION

The sampling frame for the 1999 SDR was compiled from the DRF to include individuals who:

1. Had earned a doctoral degree from a U.S. college or university in a S&E field³
2. Were U.S. citizens or, if non-U.S. citizens, indicated they had plans to remain in the United States after degree award
3. Were under 76 years of age

The 1999 frame consisted of the 1997 SDR sample supplemented with new S&E doctorate graduates who had earned their doctoral degrees since the 1997 survey and who met the conditions listed above. Those who were carried over from 1997 but had attained the age of 76 (or were deceased) were deleted from the frame.

¹The discussions presented here are partly from the 1999 Survey of Doctorate Recipients Methodology Report (Census Bureau, 2002).

²In 1999, the National Institutes of Health co-sponsored the SDR with NSF. In previous rounds, the Department of Energy and the National Endowment for the Humanities co-sponsored the survey.

³See Appendix A for a list of the science and engineering fields included in the 1999 SDR sampling frame.

The survey had two additional eligibility criteria for the survey target population. The sampled member must be a resident of the United States and not institutionalized as of the survey reference date.

SAMPLE DESIGN

In 1999, the SDR sample size was 40,000. The total sample was selected from three groups:

- Old cohort cases with doctoral degrees earned prior to July 1, 1992
- Nearly new cohort cases with doctoral degrees earned between July 1, 1992 and June 30, 1996
- New cohort cases with doctoral degrees earned between July 1, 1996 and June 20, 1998

The goals of the 1999 SDR sample design included the following:

- Reduce the variation in the sampling weights of the old and nearly new cohorts
- Allocate the sample so the variance of overall population estimates are minimized
- Allocate the sample so the sampling rate of the new cohort is at least 15 percent higher than that of the old cohort
- Allocate the sample so the sampling rate of the nearly new cohort is at least 10 percent higher than that of the old cohort
- Adjust the sample allocation if any large stratum receives a disproportionate amount of sample

To ensure that the sampling rate of the new cohort was at least 15 percent higher than that of the old cohort, 4,000 of the total sample was from the new cohort group. The remaining 36,000 sample cases were then divided so that the nearly new cohort would have a 10 percent higher sample allocation than the old cohort.

The basic sampling design was a stratified design where strata were defined by 15 broad fields of study, 2 genders, and an 8-category “demographic group” variable combining race/ethnicity, disability status, and citizenship

status. The sample cases were combined in the multi-way cross of the stratification variables. The sample allocation to select the cases from each stratum followed a seven-step process. For strata where the allocated sample size was equal to the frame size, all cases were selected for the sample. For all other strata, sample cases were selected using the probability-proportional-to-size (PPS) selection method separately for each cohort group (with the sampling weights as the size measure).

The overall sampling rate was about 1 in 16 (6.2 percent) in the 1999 SDR, applied to an estimated science and engineering doctoral population of 650,300. However, sampling rates varied considerably within and among the strata.

SURVEY CONTENT

The 1999 SDR still retained the questionnaire design changes that were implemented in 1993. A large set of core data items is conveyed from year to year to enable trend comparisons. Each survey year, a different set of module questions on special topics of interest are included. For example, the 1995 SDR questionnaire had a postdoc module and the 1997 had special modules on alternative work arrangements, job security concerns, and recent doctorates' initial career experiences. No special module was introduced in the 1999 questionnaire except for the retention of a few recent doctorate module questions from 1997, such as first career path job and doctoral training experiences.

DATA COLLECTION

The 1999 SDR data collection consisted of two phases: a self-administered mail survey, followed by computer-assisted telephone interviewing (CATI) of a sample of the nonrespondents to the mail survey. The mail survey consisted of an advance letter and the several waves of a personalized mailing package, with a reminder postcard between the first and second questionnaire mailing. The advance letter was sent in May 1999, followed by the first mailing a week later. The second mailing via USPS priority mail was sent in July 1999. The CATI follow-up of mail nonrespondents ended in February 2000.

RESPONSE RATES

The overall unweighted response rate for the 1999 SDR was 81.5 percent. The response to the mail phase of the survey was about 70 percent. The response rate to the CATI phase was about 43 percent. The overall

weighted response rate was about 82 percent (weighted response divided by the weighted sample cases).

DATA PREPARATION

Data preparation for the 1999 SDR consisted of clerical, keying, and coding operations performed manually by the Census National Processing Center (NPC) and the computer operations performed by the Census Demographic Surveys Division (DSD). Data preparation began in May 1999 when the first mail questionnaires were returned to the NPC and continued through October 2000 when the DSD delivered the SESTAT formatted, edited, imputed data file to the NSF.

As the mail questionnaires were received, they were checked into the tracking system. The mail-returned questionnaires that had one or more entries were clerically edited for data entry preparation. The clerical edit was limited to simple edits such as correcting illegible entries; rounding fractions to the closest whole number; verifying that city, state, and country entries were in the correct location.

Clerically edited questionnaires were grouped into batches, keyed, and verified using the Key Entry III (KE III) system. The KE III system generated a keying report to track the status of cases through the keying operation. As part of quality control procedures, 5 percent verification was performed of all keyed questionnaires. For some questionnaire items (F9 Birthdate, F13/F14/F16 Contact information), a 100 percent verification of questionnaire items was performed.

NPC transmitted the keyed questionnaire data on a regular basis during the data collection phase to the DSD. DSD performed computer editing to identify cases with missing critical items (A1/A2 labor force status, A6/A21 job codes, F6 resident status in U.S., F9 birthdate) and generated Telephone Follow-up sheets. Telephone callbacks were made to obtain a response to these critical items; otherwise they were considered as incomplete responses. Whenever these callbacks were made, every attempt was made to obtain responses to other missing important data items (A7 FT/PT status, A15/A17 employment sector, A18/A19 type of educational institution, A26 job start date, A30/A31 work activities, and F14 future contact information).

Since the DSD collected data in mail and CATI, the data sets were merged into one data set. The coding

operation involved special coding of occupation and education codes, other specify coding, state and country coding and IPEDS coding. For special coding of occupation, the respondent's occupational data were reviewed along with other work-related data from the questionnaire by specially trained coders to "correct" known respondent self-reporting problems to obtain the "best" occupation codes. The education code for a newly earned degree was assigned strictly based on the degree field verbatim.

The "other specify" responses were backcoded to existing response categories using the SESTAT other specify coding guidelines. Employer location (A11), Degreed school location (D6) and Country of citizenship (F8) were assigned the appropriate three-digit FIPS state/country code. The Integrated Postsecondary Education Data System (IPEDS) was used to assign codes for the employers (A11) that are postsecondary institutions and for the newly earned degree school (D6).

A detailed edit specification was developed from the SESTAT edit guidelines to perform further computer editing of multiple values to "Mark One" questions, skip errors, range errors, internal inconsistencies, cross-year inconsistencies. Basic frequency distributions of all survey items showed item nonresponse rates to be generally less than 3 percent. Nonresponse to a few questions deemed somewhat sensitive, such as household income, was around 6.2 percent.

To compensate for item nonresponse, data not reported by the respondents as well as responses of "refused" or "don't know" were imputed. Imputation is a process for treating missing data. Imputation methods are used when answers to questions are blank or not usable. Two imputation methods were used: (1) logical imputation, and (2) hot deck imputation. For logical imputation, either the respondent's answers to related questions determined what the missing value had to be, or the respondent's answer to the same question in the prior survey round was substituted for the missing value. The latter approach of using the historical data is often called "cold deck" imputation. Cold deck imputation is useful for variables that are static, such as place of birth or gender. When logical imputation was used, it was employed before hot deck imputation.

In hot deck imputation, a donor case is selected from the current round of respondents by matching related variables. The donor case's response is used as a proxy

for the recipient's missing variable. Hot deck imputation is the method of choice for variables that may change over time, such as employment characteristics. Hot deck is preferable to model-based imputation in this application because it easily preserves correlation among variables and maintains the valid response ranges for categorical variables.

WEIGHTING AND ESTIMATION

To enable weighted analyses of the 1999 SDR data, a sample weight was calculated for every person in the sample. The primary purpose of the weights is to create representative estimates by adjusting for unequal probabilities of selection. The second purpose is to adjust for the effects of nonresponse without increasing the variance. Informally, a sampling weight approximates the number of persons in the Ph.D. population that a sampled person represents. A main goal of this weighting plan is to produce final weights that reduce the non-response bias in our survey estimates, without increasing the variance.

The weights were calculated in several stages. The first stage was the calculation of base weights that account for the sample design. A base weight is the inverse of the probability of selection in the SDR sample. For cases selected with certainty, the 1999 SDR base weight is equal to the 1999 SDR initial weight. For all other cases, the 1999 SDR base weight is greater than the initial weight. This increase reflects an adjustment for cases not selected for the sample.

From the 1999 SDR base weights, the production of the 1999 SDR final weights involved four main steps:

- Adjustment for duplicate, frame ineligible, and never earned doctorate cases
- Calculation of the 1999 SDR control totals
- Calculation of the 1999 SDR noninterview weights
- Calculation of the 1999 SDR final weights

Raking ratio adjustment was used to control the 1999 SDR sample back to the 1999 SDR population totals. The purpose of this adjustment is twofold:

- To decrease the sampling variability
- To account for changes in the final weights due to changes in the eligible sampling frame

RELIABILITY

Because the estimates produced from this survey are based on a sample, they may vary from those that would have been obtained if all members of the target population had been surveyed (using the same questionnaire and data collection methods). Two types of error are possible when population estimates are derived from any sample survey: sampling error and nonsampling error. By looking at these errors, it is possible to estimate the accuracy and precision of the survey results.

Sampling error is the variation that occurs by chance because a sample, rather than the entire population, is surveyed. The particular sample that was used to estimate the 1999 population of science and engineering doctorates in the United States was one of a large number of samples that could have been selected using the same sample design and size. Estimates based on each of these samples would have differed. Thus, one should be particularly careful when interpreting results based on a relatively small number of cases or on small differences between the estimates.

Due to the large amount of data collected in the SDR, it is not practical to directly calculate variance estimates for every survey estimate. Instead, generalized variance functions were developed to model the variance estimates for certain characteristics. Parameters derived from these generalized variance functions approximate variance estimates for all survey items. As a result, these sampling errors provide an indication of the order of magnitude of a sampling error rather than a precise sampling error for any specific item.

The variances on the survey estimates were calculated by the successive difference replication method. This replication method was used to first calculate a small number of variance estimates, which were then used to estimate the parameters of the generalized variance function. An one-parameter model was used to calculate the generalized variance parameters which were estimated using an iterative weighted least square procedure.

Since many of the SDR estimates of interest consist of small populations such as estimates of Hispanic sciences or black engineers, the finite population correction factor was consistently applied to all the variance estimates.

Different generalized variance functions were used to estimate standard errors associated with a broader

range of totals and percentages. The a and b parameters were calculated for each of the demographic groups and fields of study shown in Appendix C. The a and b parameters can be used to approximate standard errors for the S&E doctoral population overall, for broad field groupings used by NSF, and for selected subgroups of analytic interest.

STANDARD ERROR OF ESTIMATED NUMBERS

To calculate the desired standard errors on numbers, let X denote the estimated number. The standard error can be approximated using the appropriate values of a and b along with the following formula for standard errors of totals:

$$SE(X) = [aX^2 + bX]^{1/2} \quad (1)$$

When calculating standard errors for numbers from tabulations involving different characteristics, use the set of parameters for the characteristic which will give the largest standard error.

Illustration

Suppose an estimated 2,770 females with a doctorate in the biological sciences were reported as working in the Federal Government in 1999.

Use the appropriate generalized variance parameters from Appendix C to get:

Survey estimate X	=	2,770
a parameter	=	-0.000085
b parameter	=	13.0631

Use formula (1) to approximate the standard error on the estimated number of 2,770 as:

$$SE(X) = [(-0.000085 \times 2,770^2) + (13.0631 \times 2,770)]^{1/2} \\ = 189$$

The 95% confidence interval is calculated using the following formula:

$$95\% CI = X \pm 1.96 \times SE(X) \quad (2)$$

where

X is the survey estimate of interest, and $SE(X)$ is the estimated standard error for the survey estimate of interest.

Using formula (2) above, the 95% confidence interval is:

$$2,770 \pm 1.96 \times 189 \text{ or } 2,770 \pm 370$$

Therefore, the 95% confidence interval has the following limits:

$$\begin{aligned}\text{Lower limit} &= 2,401 \\ \text{Upper limit} &= 3,139\end{aligned}$$

So we can say with 95% confidence that the number of females with biological sciences doctorates working in the Federal Government in 1999 is estimated to be between 2,401 and 3,139.

STANDARD ERROR OF ESTIMATED PERCENTAGES

To calculate the standard errors on percentages, let p equal the percentage possessing the specific characteristic and X and Y represent the numerator and denominator, respectively, of the ratio that yields the observed percentage. The standard error of a percentage may be approximated using the formula:

$$\text{SE}(p) = p(\{\text{SE}(X)^2/X^2\}) - (\{\text{SE}(Y)^2/Y^2\})^{1/2} \quad (3)$$

where

X and Y are survey estimates of interest, $\text{SE}(X)$ and $\text{SE}(Y)$ are the corresponding standard error estimates derived using formula (1), and p is the estimated percentage ($p = (X/Y) \times 100$).

Illustration

Suppose an estimated 2,770 of the 8,870 biological sciences doctorates working in the Federal Government are women. Therefore, the estimated percentage of biological sciences doctorates working in the Federal Government who are women is 31.2%.

Use formula (1) and the appropriate parameters from Appendix C, to get:

	X	Y	p
Survey estimate	2,770	8,870	31.2%
<i>a</i> parameter	-0.000085	-0.000092	—
<i>b</i> parameter	13.0631	16.8031	—
Standard error	189	377	

Insert the above numbers into formula (3) to approximate the standard error on the estimate of 31.2% as:

$$\text{SE}(p) = 31.2 [(189^2/2,770^2) - (377^2/8,879^2)]^{1/2} = 1.7\%$$

Using formula (2), the 95% confidence interval is:

$$31.2\% \pm 1.96 \times 1.7\% \text{ or } 31.2\% \pm 3.3\%$$

Therefore, the 95% confidence interval has the following limits:

$$\begin{aligned}\text{Lower limit} &= 27.9\% \\ \text{Upper limit} &= 34.5\%\end{aligned}$$

STANDARD ERROR OF A DIFFERENCE

To calculate the standard errors of the difference between two sample estimates, let X and Y represent two estimates of interest and $\text{SE}(X)$ and $\text{SE}(Y)$ the corresponding standard error estimates derived using formula (1).

$$\text{SE}(X - Y) = \{[\text{SE}(X)]^2 + [\text{SE}(Y)]^2\}^{1/2} \quad (4)$$

The estimates can be numbers, percentages, ratios, etc. This will represent the actual standard error quite accurately for the difference between estimates of the same characteristic in two different areas or for the difference between separate and uncorrelated characteristics in the same area.

Illustration

In 1999, suppose there were an estimated 6,100 male and 2,770 female biological sciences doctorates. The apparent difference between the estimated number of male and female biological sciences doctorates is 3,330.

Use the appropriate parameters from Appendix C and formula (1) to get:

	X	Y	Difference
Survey estimate	6,100	2,770	3,330
<i>a</i> parameter	-0.000092	-0.000085	—
<i>b</i> parameter	16.8031	13.0631	—
Standard error	315	189	

The standard error of the difference is calculated using formula (4):

$$SE(X - Y) = (\sqrt{315^2 + 189^2})^{1/2} = 367$$

The 95% confidence interval is calculated as $3,330 \pm 1.96 \times 367$ or $3,330 \pm 719$. Since this interval does not include zero, we can conclude with 95% confidence that the estimated number of male life sciences doctoral recipients is significantly higher than the number of female life sciences doctoral recipients.

However, if there is a high positive (negative) correlation between the two characteristics, the formula will overestimate (underestimate) the true standard error.

In addition to sampling error, data are subject to nonsampling error, which can arise at many points in the survey process. Sources of nonsampling error take many different forms: (1) nonresponse bias, which arises when the characteristics of individuals who do not respond to a survey differ significantly from those who do; (2) measurement error, which arises when we are not able to precisely measure the variables of interest; (3) coverage error, which arises when some members of the target population are not identified and thus do not have a chance to be selected for the sample; and (4) processing error, which can arise at the point of data editing, coding or key entry. These sources of error are much harder to estimate than sampling errors.

IMPORTANT NOTES ON THE TABLES

The following definitions are provided to help facilitate the use of data in the detailed tables.

Field of doctorate is the field of degree as specified by the respondent in the Survey of Earned Doctorates (SED) at the time of degree conferral. These codes were subsequently recoded to the SESTAT codes. (See Appendix A for the doctorate degree fields.)

Occupation data were derived from responses to several questions on the type of work primarily performed by the respondent. The occupational classification of the respondent was based on his/her principal job held during the reference week—or last job held, if not employed in the reference week (questions A20 or A5). Also used in the occupational classification was a respondent-selected job code (questions A21 or A6). (See Appendix B for the list of occupations.)

Sector of employment was based on responses to questions A15 and A17. The category “universities and 4-year colleges” includes 4-year colleges or universities, medical schools (including university-affiliated hospitals or medical centers), university- affiliated research institutions, and other types of institutions. “Private-for-Profit” includes those self-employed in incorporated business.

Employer location was based primarily on responses to question A11 on the location of the principal employer. Individuals not reporting place of employment were classified by their last mailing address.

Primary work activity was determined from responses to question A30. “Development” includes the development of equipment, products, and systems. “Design” includes the design of equipment, processes, and models.

Federal support was determined from responses to questions A41 and A42.

Faculty rank/tenure status was obtained from the responses to questions A18 and A19.

Race/ethnicity categories of white, black, Asian/ Pacific Islander and American Indian/ Alaskan Native refer to non-Hispanic individuals only. These data are from the SED.

Citizenship status category of non-U.S., temporary resident does not include individuals who, at the time they received their doctorate, expressed plans to leave the United States. These individuals were excluded from the sampling frame.

Salary data were derived from responses to question A34, in which information was requested regarding annual salary before deductions for the principal job held during April 1999, excluding income from bonuses, overtime, and summer teaching/research. Salaries reported are median annual salaries, rounded to the nearest \$100 and computed for full-time employed sciences and engineers. For individuals employed by education institutions, no accommodation was made to convert academic-year salaries to calendar-year salaries. Users are advised that due to changes in the salary question since 1993, the 1995, 1997 and 1999 salary data are not strictly comparable with 1993 data.

Labor force participation rate. The labor force is defined as those employed (E) plus those unemployed (U, those not-employed persons actively seeking work). Population (P) is defined as all S&E doctorate holders under age 76, residing in U.S. during the week of April 15, 1999, who earned their doctorate from a U.S. institution. The labor force participation rate (R_{LF}) is the ratio of the labor force to the population (P).

$$R_{LF} = (E+U) / P$$

Unemployment rate. The unemployment rate (R_u) is the ratio of those who are unemployed but seeking employment (U) to the total labor force (E+U). $R_u = U / (E+U)$

Involuntarily out-of-field rate. The involuntarily out-of-field rate is the percent of employed individuals who reported they were either:

- Working part-time exclusively because suitable full-time work was not available
- Working in an area in their principal job not related to the first doctoral degree at least partially because suitable work in the field was not available.

SUMMARY OF TABLE CHANGES IN 1999 COMPARED TO 1997 TABLES

GLOBAL CHANGES

1. For all degree field tables, “Computer and information sciences” and “Mathematical sciences” are now separately displayed as broad field groups.
2. Tables were regrouped and renumbered to display the field-of-doctorate-based tables first, followed by the occupation-based tables.
3. Percent distributions were added to most tables in addition to estimated numbers.
4. On all occupation-based tables, “Material/metallurgical engineers” group, which is a larger group, replaced “Industrial engineers.”

Specific table modifications in 1999 [1997 table number]

Table 7 [9,11]	Gender and race/ethnicity tables by doctorate field data are now combined into one table and reported for employed only.
Table 8 [13]	Citizenship status by doctorate field data are reported for employed only.
Table 9 [15]	Age by field of doctorate field data are reported for employed only.
Table 14 [22]	“Primary or secondary” work activity data replace “Primary” work activity.
Table 15 [24]	Puerto Rico is now listed separately from other U.S. Territories.
Table 29 [10,12]	Gender and race/ethnicity by occupation data are reported for employed only.
Table 30 [14]	Citizenship status by occupation data are reported for employed only.
Table 31 [16]	Age by occupation data are reported for employed only.
Table 36 [23]	“Primary or secondary” work activity data replace “Primary” work activity.
Table 37 [25]	Puerto Rico is now listed separately from other U.S. Territories.
Table 40 [30]	“Years since doctorate” data replace “Employer location.”
Table 41 [31,35]	1997 tables 31 and 35 are now combined into one table. “Primary or secondary work activity” and “Years since doctorate” data replace the “Employer location” and “Place of birth” data in 1997 table 31; table title changed to “selected demographic and employment-related characteristics.”

Table 42 [33,34]	1997 tables 33 and 34 are now combined into one table. “Years since doctorate” data replace “Place of birth”; “Primary or secondary work activity” data replace “Primary” work activity; table title changed to “selected demographic and employment-related characteristics.”	Table 17	Faculty rank by years since doctorate. “Adjunct” and “Other faculty” data are shown under “All other faculty”
Table 43 [32,36]	1997 tables 32 and 36 are now combined into one table. “Employment sector” and “Years since doctorate” data replace “Employer location” and “Place of birth”; “Primary or secondary work activity” data replace “Primary” work activity; table title changed to “selected demographic and employment-related characteristics.”	Table 18	Faculty rank by race/ethnicity. “Adjunct” and “Other faculty” data are shown under “All other faculty”
Table 48 [57]	“Years since doctorate” data replace ‘year of doctorate.’	Table 20	Tenure status by years since doctorate
Table 53 [58]	Puerto Rico is now listed separately from other U.S. Territories.	Table 21	Tenure status by race/ethnicity
Table 68 [59]	Puerto Rico is now listed separately from other U.S. Territories.	Table 32	Occupation by years since doctorate

SECTION III. DETAILED STATISTICAL TABLES

<i>Table</i>	<i>Page</i>
CHARACTERISTICS BY FIELD OF DOCTORATE	
Doctoral scientists and engineers,	
1. by field of doctorate and employment status: 1999	15
2. by broad field of doctorate, employment status, and sex: 1999	16
3. by broad field of doctorate, employment status, and race/ethnicity: 1999	18
4. selected employment characteristics by field of doctorate: 1999	20
5. by field of doctorate and sex: 1999	21
6. by field of doctorate and race/ethnicity: 1999	22
Employed doctoral scientists and engineers,	
7. by field of doctorate, race/ethnicity and sex: 1999	24
8. by field of doctorate and citizenship status: 1999	28
9. by field of doctorate and age: 1999	30
10.* by field of doctorate and years since doctorate: 1999	32
11. by field of doctorate and sector of employment: 1999	34
12.* by sector of employment, broad field of doctorate, and sex: 1999	36
13.* by sector of employment, broad field of doctorate, and race/ethnicity: 1999	38
14.** by field of doctorate and primary or secondary work activity: 1999	42
15.** by employer location and broad field of doctorate: 1999	44
Employed doctoral scientists and engineers in universities and 4-year colleges, by broad field of doctorate,	
16. sex, and faculty rank: 1999	48
17.* sex, faculty rank, and years since doctorate: 1999	49
18.* race/ethnicity and faculty rank: 1999	50
19. sex, and tenure status: 1999	52
20.* sex, tenure status, and years since doctorate: 1999	53
21.* race/ethnicity, and tenure status: 1999	54
22. primary work activity, and secondary work activity: 1999	56
CHARACTERISTICS BY OCCUPATION	
Doctoral scientists and engineers,	
23. by occupation and employment status: 1999	58
24. by broad occupation, employment status, and sex: 1999	59
25. by broad occupation, employment status, and race/ethnicity: 1999	61
26. selected employment characteristics by occupation: 1999	63
27. by occupation and sex: 1999	64
28. by occupation and race/ethnicity: 1999	65

<i>Table</i>	<i>Page</i>
--------------	-------------

Employed doctoral scientists and engineers,

29.	by occupation, race/ethnicity, and sex: 1999	67
30.	by occupation and citizenship status: 1999	71
31.	by occupation and age: 1999	73
32.*	by occupation and years since doctorate: 1999	75
33.	by occupation and sector of employment: 1999	77
34.*	by sector of employment, broad occupation, and sex: 1999	79
35.*	by sector of employment, broad occupation, and race/ethnicity: 1999	81
36.**	by occupation and primary or secondary work activity: 1999	85
37.**	by employer location and broad occupation: 1999	89

DEMOGRAPHIC AND EMPLOYMENT-RELATED CHARACTERISTICS

Employed doctoral scientists and engineers,

38.	by selected demographic characteristics and broad field of doctorate: 1999	93
39.	by selected demographic characteristics and broad occupation: 1999	94
40.**	by selected demographic characteristics and citizenship status: 1999	95
41.**	by selected demographic and employment-related characteristics and sector of employment: 1999	96
42.**	by selected demographic and employment-related characteristics, race/ethnicity, and sex: 1999	98
43.**	by selected demographic and employment-related characteristics and primary or secondary work activity: 1999	102
44.	by field of doctorate and broad occupation: 1999	104

SALARIES BY FIELD OF DOCTORATE

Median annual salaries of full-time employed doctoral scientists and engineers,

45.	by field of doctorate, race/ethnicity, and sex: 1999	106
46.*	by field of doctorate and citizenship status: 1999	108
47.*	by field of doctorate and age: 1999	109
48.**	by field of doctorate and years since doctorate: 1999	110
49.	by field of doctorate and sector of employment: 1999	111
50.	by sector of employment, broad field of doctorate, and sex: 1999	112
51.	by sector of employment, broad field of doctorate, and race/ethnicity: 1999	114
52.	by field of doctorate and primary or secondary work activity: 1999	116
53.**	by employer location and broad field of doctorate: 1999	117

Median annual salaries of full-time employed doctoral scientists and engineers

in universities and 4-year colleges, by broad field of doctorate,

54.*	sex, and faculty rank: 1999	119
55.*	sex, faculty rank, and years since doctorate: 1999	120
56.*	race/ethnicity, and faculty rank: 1999	121
57.*	sex, and tenure status: 1999	123
58.*	sex, tenure status, and years since doctorate: 1999	124
59.*	race/ethnicity, and tenure status: 1999	125

<i>Table</i>	<i>Page</i>
--------------	-------------

SALARIES BY OCCUPATION

Median annual salaries of full-time employed doctoral scientists and engineers,

60. by occupation, race/ethnicity, and sex: 1999	127
61.* by occupation and citizenship status: 1999	129
62.* by occupation and age: 1999	130
63.* by occupation and years since doctorate: 1999	131
64. by broad occupation and sector of employment: 1999	132
65. by sector of employment, broad occupation, and sex: 1999	133
66. by sector of employment, broad occupation, and race/ethnicity: 1999	135
67. by occupation and primary or secondary work activity: 1999	137
68.** by employer location and broad occupation: 1999	138

* New tables in 1999

** Modified since 1997

Table 1. Doctoral scientists and engineers, by field of doctorate and employment status: 1999

Field of doctorate	All fields	Employed				Unemployed/ seeking work	Retired	Not employed/ not seeking work

Mechanical engineering.....	0.7	3.9	91.6
Other engineering.....	1.7	3.9	89.4

KEY: S=Suppressed due to too few cases (fewer than 50 weighted cases).

NOTES: Labor force is defined as those employed (E) plus those unemployed and seeking work (U). Population (P) is defined as all S&E doctorate holders under age 76, residing in U.S. during the week of April 15, 1999, who earned their doctorate from U.S. institutions. The labor force participation rate (R_{LF}) is the ratio of the labor force to the population: $R_{LF} = (E+U)/P$. The unemployment rate (R_U) is the ratio of those who are unemployed but seeking employment (U) to the total labor force (E+U): $R_U = U/(E+U)$. Involuntary-out-of-field rate is the percent of employed individuals who reported they were working part-time exclusively because suitable full-time work was not available and/or working in an area not related to the first doctoral degree (in their principal job) at least partially because suitable work in the field was not available.

KEY: S=Suppressed due to too few cases (fewer than 50 weighted cases).

NOTES: Since the survey sample design does not include geography, the reliability of estimates in some states may be poor due to small sample size.

Numbers are rounded to nearest ten. Details may not add to total because of rounding.

¹ R&D includes basic or applied research, development and design.

KEY: S = Suppressed due to too few cases (fewer than 50 weighted cases).

N/A = Same work activity cannot be reported as both primary and secondary activity except for 'R&D', 'Management', and 'Other activity' because these categories include more than one type of work activity.

NOTES: Numbers are rounded to nearest ten. Details may not add to total because of rounding.

¹ Postdoc is a temporary position awarded in academe, industry or government primarily for gaining additional education and training in research.

KEY: S=Suppressed due to too few cases (fewer than 50 weighted cases). S&T = science and technology. S&E = science and engineering.

NOTES: If the respondent was unemployed during the survey reference period, occupation of last job was reported. Numbers are rounded to nearest ten.

Details may not add to total because of rounding. Excludes estimated 540 individuals who reported never having worked.

KEY: S=Suppressed due to too few cases (fewer than 50 weighted cases). S&T=science and technology. S+E=science and engineering.

NOTES: If the respondent was unemployed during the survey reference period, occupation of last job was reported. Labor force is defined as those employed (E) plus those unemployed and seeking work (U). Population (P) is defined as all S&E doctorate holders under age 76, residing in U.S. during the week of April 15, 1999, who earned their doctorate from U.S. institutions. The labor force participation rate (R_{LF}) is the ratio of the labor force to the population: $R_{LF} = (E+U)/P$.

The unemployment rate (R_U) is the ratio of those who are unemployed but seeking employment (U) to the total labor force (E+U): $R_U = U/(E+U)$. Involuntary-out-of-field rate is the percent of employed individuals who reported they were working part-time exclusively because suitable full-time work was not available and/or working in an area not related to the first doctoral degree (in their principal job) at least partially because suitable work in the field was not available.

Other U.S. territories and other areas.....	69,000	70,000	S	S	S	S	S	S	S	63,000

KEY: S=Suppressed due to too few cases (fewer than 200 weighted cases).

NOTES: Since the survey sample design does not include geography, the reliability of estimates in some states may be poor due to small sample size.
Salaries are rounded to nearest hundred.

APPENDIX B.
OCCUPATION FIELD LIST

APPENDIX B. OCCUPATION FIELD LIST

COMPUTER AND INFORMATION SCIENCES

Computer and information sciences

- 520 Computer systems analysts
- 530 Computer sciences, except systems analysts
- 540 Information systems sciences & analysts
- 550 Other computer & information science occupations
- 880 Computer engineers - software

Postsecondary teachers, computer sciences

- 276 Postsecondary teachers - Computer sciences

MATHEMATICAL SCIENCES

Mathematical sciences

- 172 Mathematicians
- 173 Operations research analysts, modeling
- 174 Statisticians
- 176 Other mathematical sciences

Postsecondary teachers, math sciences

- 286 Postsecondary teachers - Math sciences

LIFE AND RELATED SCIENCES

Agricultural sciences

- 210 Agricultural & food sciences

Biological sciences

- 022 Biochemists & biophysicists
- 023 Biological sciences
- 025 Medical sciences, except practitioners
- 027 Other biological & life sciences

Forestry and conservation sciences

- 024 Forestry & conservation sciences

Postsecondary teachers, life & related sciences

- 271 Postsecondary teachers - Agriculture
- 273 Postsecondary teachers - Biological sciences
- 287 Postsecondary teachers - Medical science
- 297 Other postsecondary teachers - Natural sciences

PHYSICAL AND RELATED SCIENCES

CHEMISTS, except biochemistry

193 Chemists, except biochemistry

EARTH sciences

192 Atmospheric & space sciences

194 Geologists, including earth sciences

195 Oceanographers

PHYSICISTS and aSTRONOMERS

191 Astronomer

196 Physicists

OTHE other physical sciences

198 Other physical & related sciences

POSTSECONDARY teachers, physical & related sciences

275 Postsecondary teachers - Chemistry

277 Postsecondary teachers - Earth, environmental & marine science

289 Postsecondary teachers - Physics

SOCIAL AND RELATED SCIENCES

ECONOMISTS

232 Economists

POLITICAL sciences

235 Political sciences

SOIOLOGISTS and aTHROPOLOGISTS

231 Anthropologists

237 Sociologists

S&T historians and other social sciences

233 Historians, science & technology

238 Other social sciences

POSTSECONDARY teachers in Social & related sciences

278 Postsecondary teachers - Economics

290 Postsecondary teachers - Politics

293 Postsecondary teachers - Sociology

298 Postsecondary teachers - Other social sciences

PSYCHOLOGISTS

Psychologists

236 Psychologists, including clinical psychologists

Postsecondary teachers, psychology

291 Postsecondary teachers - Psychology

ENGINEERS

Aerospace & aeronautical engineers

082 Aeronautical, aerospace & astronautical engineers

Chemical engineers

085 Chemical engineers

Civil and architectural engineers

086 Civil engineers, including architectural and sanitary

Electrical and related engineers

087 Computer engineers - Hardware

089 Electrical & electronics engineers

Materials/metallurgical engineers

093 Materials & metallurgical engineers

Mechanical engineers

094 Mechanical engineers

Other engineers

083 Agricultural engineers

084 Bioengineering & biomedical engineers

090 Environmental engineers

091 Industrial engineers

092 Marine engineers & naval architects

095 Mining & geological engineers

096 Nuclear engineers

097 Petroleum engineers

098 Sales engineers

099 Other engineers

Postsecondary teachers, engineering

280 Postsecondary teachers - Engineering

NON-S&E OCCUPATIONS

Top/mid-level managers, administrators, etc.

- 141 Top & mid-level managers, executives, administrators
- 151 Accountants, auditors, & other financial specialists
- 152 Personnel, training & labor relations specialists
- 153 Other management related occupations

Health and related occupations

- 111 Diagnosing & treating health practitioners
- 112 Registered nurses, pharmacists, dieticians, therapists, etc.
- 113 Health technologists & technicians
- 114 Other health occupations

Teachers, except S&E postsecondary teachers

- 251 Teachers, pre-kindergarten & kindergarten
- 252 Teachers, elementary school
- 253 Teachers, secondary - Computer, math or science
- 254 Teachers, secondary - Social sciences
- 255 Teachers, secondary - Other subjects
- 256 Teachers, special education
- 257 Teachers, other precollege education
- 272 Postsecondary teachers - Art, drama, and music
- 274 Postsecondary teachers - Business commerce and marketing
- 279 Postsecondary teachers - Education
- 281 Postsecondary teachers - English
- 282 Postsecondary teachers - Foreign language
- 283 Postsecondary teachers - History
- 284 Postsecondary teachers - Home economics
- 285 Postsecondary teachers - Law
- 288 Postsecondary teachers - Physical education
- 292 Postsecondary teachers - Social work
- 294 Postsecondary teachers - Theology
- 295 Postsecondary teachers - Trade & industrial
- 296 Postsecondary teachers - Other health specialties
- 299 Postsecondary teachers - Other non-science & engineering not listed above

Social service and related occupations

- 040 Clergy & other religious workers
- 070 Counselors, educational & vocational
- 240 Social workers

Technicians/technologists

- 026 Technologists/technicians in biology/life sciences
- 051 Computer programmers
- 100 Electrical, industrial, mechanical engineering technologist/technicians
- 101 Drafting occupations, including computer drafting

Technicians/technologists (continued)

- 102 Surveying & mapping engineering technicians
- 103 Other engineering technologists and technicians
- 104 Surveyors
- 175 Technologists/technicians In mathematical sciences
- 197 Technologists/technicians In physical sciences

Sales and marketing occupations

- 200 Sales/marketing-Insurance, securities, real estate & business services
- 201 Sales occupations - Commodities, except retail
- 202 Sales occupations - Retail
- 203 Other marketing & sales occupations

Other non-S&E occupations

- 010 Artists, broadcasters, editors, entertainers, public relations specialists, writers
- 031 Accounting clerks & bookkeepers
- 032 Secretaries, receptionists & typists
- 033 Other administrative
- 081 Architects
- 110 Farmers, foresters, & fishermen
- 120 Lawyers & judges
- 130 Librarians, archivists & curators
- 171 Actuaries
- 221 Food preparation & service Workers
- 222 Protective service workers
- 223 Other service occupations, except health
- 234 Historians, except science & technology
- 401 Construction trades, miners & well drillers
- 402 Mechanics & repairers
- 403 Precision production occupations
- 404 Operators & related occupations
- 405 Transportation & material moving occupations
- 500 Other occupations
- 995 Other fields (Not Listed)

APPENDIX C.
1999 SDR GENERALIZED VARIANCE PARAMETERS

APPENDIX C. 1999 SDR GENERALIZED VARIANCE PARAMETERS

Listing of generalized variance parameters for selected demographic groups in science and engineering fields, 1999

Characteristic	Estimated parameters	
	'a'	'b'
Total doctorate recipients	-0.000029	19.1944
Female	-0.000111	17.1594
White	-0.000031	19.1348

APPENDIX D.
1999 SURVEY OF DOCTORATE RECIPIENTS
QUESTIONNAIRE

1999 Survey of Doctorate Recipients

This information is solicited under the authority of the National Science Foundation Act of 1950, as amended. All information you provide will be treated as confidential and used only for research or statistical purposes by the survey sponsors (the National Science Foundation and the National Institutes of Health), their contractors, and collaborating researchers for the purpose of analyzing data and preparing scientific reports and articles. Any information publicly released (such as statistical summaries) will be in a form that does not personally identify you. Your response is voluntary and failure to provide some or all of the requested information will not in any way adversely affect you. Actual time to complete the questionnaire may vary depending on your circumstances. On the average, it will take about 25 minutes to complete the questionnaire. If you have any comments on the time required for this survey, please send them to Suzanne H. Plimpton, National Science Foundation, 4201 Wilson Boulevard, Suite 295, Arlington, VA 22230. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Conducted by:
U.S. Department of Commerce
BUREAU OF THE CENSUS

for the
National Science Foundation
Arlington, VA

INSTRUCTIONS

Thank you for taking the time to complete this questionnaire. Directions for filling it out are provided with each question. Because not all questions will apply to everyone, you may be asked to skip certain questions.

- In order to get comparable data, we will be asking you to refer to the week of April 15, 1999 (e.g., April 11 – April 17, 1999) when answering most questions
- Follow all "SKIP" instructions AFTER marking a box. If no "SKIP" instruction is provided, you should continue to the NEXT question
- Either a pen or pencil may be used
- When answering questions that require marking a box, please use an "X"
- If you need to change an answer, please make sure that your old answer is either completely erased or clearly crossed out

Thanks again for your help, we really appreciate it.

PART A – Employment Status During the Reference Week of April 11 – 17, 1999

A1. Were you working for pay (or profit) during the week of April 15, 1999? This includes a post-doctoral appointment, being self-employed or temporarily absent from a job even if unpaid (e.g., illness, vacation or parental leave).

1 Yes → **SKIP to A7**

2 No

A2. (IF NO) Did you look for work during the four weeks preceding April 15, 1999 (that is, any time between March 19 and April 15, 1999)?

1 Yes

2 No

A3. What were your reasons for not working during the week of April 15?

Mark (X) all that apply

Year Retired

1 Retired → 19

2 On layoff from a job

3 Student

4 Family responsibilities

5 Chronic illness or permanent disability

6 Suitable job not available

7 Did not need or want to work

8 Other – Specify ↗

A4. Prior to the week of April 15, 1999, when did you last work for pay (or profit)?

0 ← **Mark (X) this box if never worked for pay (or profit) and SKIP to Part D, page 7**

Month

Year

LAST WORKED

19

A5. What kind of work were you doing on this last job – that is, what was your occupation? Please be as specific as possible, including any area of specialization.

EXAMPLE: College professor – Electrical engineering

A6. Using the JOB CODES LIST (pages 12–13), choose the code that BEST describes the work you were doing on this last job.

CODE | → **SKIP to A41, page 6**

A7. (IF WORKED DURING WEEK OF APRIL 15TH) Counting all jobs held during the week of April 15, 1999, did you USUALLY work . . .

1 A total of 35 or more hours per week → **SKIP to A10**

2 Fewer than 35 hours per week

A8. (IF FEWER THAN 35 HOURS) During the week of April 15, did you want to work a full-time work week of 35 or more hours?

1 Yes

2 No

A9. What were your reasons for working a part-time work week (i.e., less than 35 hours) during the week of April 15?

Mark (X) all that apply

Year Retired

1 Retired or semi-retired → 19

2 Student

3 Family responsibilities

4 Chronic illness or permanent disability

5 Suitable full-time work week job not available

6 Did not need or want to work full-time

7 Other – Specify ↗

→ **SKIP to A11, page 2**

A10. (IF 35 OR MORE HOURS) Although you were working during the week of April 15, had you previously RETIRED from any position?

Examples of retirement include mandatory retirement, early retirement, or voluntary retirement

Year Retired

1 Yes → 19

2 No

The next several questions ask about your principal employer.

A11. Who was your principal employer during the week of April 15, 1999?

IF MORE THAN ONE JOB: Record employer for whom you worked the most hours that week

IF EMPLOYER HAD MORE THAN ONE LOCATION: Record location where you usually worked

Employer Name

City/Town

State/Foreign Country

ZIP Code

A12. Thinking about your employer's main business (i.e., what your employer makes or does), under which of these categories does your employer's main business BEST fit?

IF PRINCIPAL EMPLOYER HAS MORE THAN ONE TYPE OF BUSINESS: Please answer for the type of business primarily performed at the location where you work

Mark (X) ONLY One

- 1 Agriculture, forestry, or fishing
 - 2 Biotechnology
 - 3 Construction or mining
 - 4 Education
 - 5 Finance, insurance or real estate services
 - 6 Health services
 - 7 Information technology or computer services
 - 8 Other services (e.g., social, legal, business)
 - 9 Manufacturing
 - 10 Public administration/government
 - 11 Research – Specify ↗
-

- 12 Transportation services, utilities or communications
- 13 Wholesale or retail trade
- 14 Other

A13. Counting all locations where this employer operates, how many people work for your principal employer? Your best estimate is fine.

Mark (X) ONLY One

- 1 Under 10 employees
- 2 10–24 employees
- 3 25–99 employees
- 4 100–499 employees
- 5 500–999 employees
- 6 1,000–4,999 employees
- 7 5,000+ employees

A14. Did your principal employer come into being as a new business within the past 5 years?

1 Yes

2 No

A15. Was your principal employer during the week of April 15 . . .

IF EMPLOYER WAS A SCHOOL: Mark (X) the type of organizational charter (e.g., mark "state government" for state schools; most private schools are "private not-for-profit")

Mark (X) ONLY One

- 1 A PRIVATE FOR-PROFIT company, business or individual, working for wages, salary or commissions
 - 2 A PRIVATE NOT-FOR-PROFIT, tax-exempt, or charitable organization
 - 3 SELF-EMPLOYED in own NOT INCORPORATED business, professional practice, or farm
 - 4 SELF-EMPLOYED in own INCORPORATED business, professional practice, or farm
 - 5 Local GOVERNMENT (e.g., city, county)
 - 6 State GOVERNMENT
 - 7 U.S. military service, active duty or Commissioned Corps (e.g., USPHS, NOAA)
 - 8 U.S. GOVERNMENT (e.g., civilian employee)
 - 9 Other – Specify ↗
-

A16. Was your principal employer an educational institution?

1 Yes

2 No → **SKIP to A20, page 3**

A17. (IF EDUCATIONAL INSTITUTION) Was this educational institution a . . .

Mark (X) ONLY One

- 1 Preschool, elementary, or middle school or system SKIP to A20, page 3
 - 2 Secondary school or system

 - 4 Four-year college or university, other than a medical school
 - 5 Medical school (including university-affiliated hospital or medical center)
 - 6 University-affiliated research institute
 - 7 Something else – Specify ↗
-

A18. What was your faculty rank?*Mark (X) ONLY One*

- 1 Not applicable at this institution
 - 2 Not applicable for my position
 - 3 Professor
 - 4 Associate Professor
 - 5 Assistant Professor
 - 6 Instructor
 - 7 Lecturer
 - 8 Adjunct Faculty
 - 9 Other – *Specify* ↗
-
-

A22. Did your duties on this job require the technical expertise of a bachelor's degree or higher in . . .*Mark (X) Yes or No for each*

YES NO

1. Engineering, computer science, math, or the natural sciences . . . 1 2
 2. The social sciences 1 2
 3. Some other field (e.g., health or business) – *Specify* ↗ 1 2
-
-

A23. Was this job a "postdoc"?

A "postdoc" is a temporary position awarded in academe, industry, or government primarily for gaining additional education and training in research

1 Yes2 No → **SKIP to A26, page 4****A24. (IF YES) What were your reasons for taking this postdoc?***Mark (X) Yes or No for each*YES NO
↓ ↓

1. Additional training in PhD field . . . 1 2
 2. Training in an area outside of PhD field 1 2
 3. Work with a specific person or place 1 2
 4. Other employment not available 1 2
 5. Postdoc generally expected for career in this field 1 2
 6. Some other reason – *Specify* ↗ . . . 1 2
-
-

A25. What were your two MOST important reasons for taking this postdoc? Enter number of appropriate reason from A24 above.1. MOST important reason2. SECOND MOST important reason
*(Enter "0" if no second most)***A20. What kind of work were you doing on your principal job held during the week of April 15, 1999 — that is, what was your occupation? Please be as specific as possible, including any area of specialization.***EXAMPLE: College professor – Electrical engineering***A21. Using the JOB CODES LIST (pages 12–13), choose the code that BEST describes the work you were doing on your principal job during the week of April 15.**CODE | |

A26. During what month and year did you start this job, (that is, your principal job held during the week of April 15, 1999)?

Month	Year
JOB STARTED	19

A27. Thinking about the relationship between your work and your education, to what extent was your work on your principal job held during the week of April 15 related to your (first U.S.) doctoral degree? Was it . . .

Mark (X) ONLY One

- 1 Closely related → **SKIP to A30**
- 2 Somewhat related
- 3 Not related

A28. (IF NOT RELATED) Did these factors influence your decision to work in an area OUTSIDE THE FIELD OF YOUR (FIRST U.S.) DOCTORAL DEGREE?

Mark (X) Yes or No for each

YES	NO
↓	↓

- 1. Pay, promotion opportunities . . .
- 2. Working conditions (e.g., hours, equipment, working environment)
- 3. Job location
- 4. Change in career or professional interests
- 5. Family-related reasons (e.g., children, spouse's job moved) . . .
- 6. Job in highest degree field not available
- 7. Other reason – *Specify ↗*

A29. Which TWO factors in A28 represent your MOST important reasons for working in an area outside the field of your (first U.S.) doctoral degree? Enter number of appropriate reason from A28 above.

1. _____ MOST important reason
2. _____ SECOND MOST important reason
(Enter "0" if no second most)

A30. The next question is about your work activities on your principal job. Which of the following work activities occupied 10 percent or more of your time during a TYPICAL work week on this job?

Mark (X) Yes or No for each

YES NO

- 1. Accounting, finance, contracts . . .
- 2. Applied research – study directed toward gaining scientific knowledge to meet a recognized need
- 3. Basic research – study directed toward gaining scientific knowledge primarily for its own sake
- 4. Computer applications, programming, systems development
- 5. Development – using knowledge gained from research for the production of materials, devices . .
- 6. Design of equipment, processes, structures, models
- 7. Employee relations – including recruiting, personnel development, training
- 8. Managing and supervising
- 9. Production, operations, maintenance (e.g., truck driving, machine tooling, auto/machine repairing)
- 10. Professional services (e.g., health care, counseling, financial services, legal services)
- 11. Sales, purchasing, marketing, customer service, public relations
- 12. Quality or productivity management
- 13. Teaching
- 14. Other – *Specify ↗*

A31. On which TWO activities in A30 did you work the MOST hours during a typical week on this job? Enter number of appropriate activity from A30 above.

1. _____ Activity MOST hours

2. _____ Activity SECOND MOST hours
(Enter "0" if no second most)

A32. Did you supervise the work of others as part of your principal job held during the week of April 15?

Mark "YES": If you assigned duties to workers AND recommended or initiated personnel actions such as hiring, firing or promoting

TEACHERS: Do NOT count students

1 Yes

2 No → **SKIP to A34**

A33. (IF YES) How many people did you typically . . .

IF NONE: Enter "0"

Number
Supervised

1. Supervise DIRECTLY?

2. Supervise through subordinate supervisors?

A34. Before deductions, what was your basic ANNUAL salary on this job as of the week of April 15, 1999? (Do NOT include bonuses, overtime, or additional compensation for summertime teaching or research)

IF NOT SALARIED: Please estimate your earned income, excluding business expenses

\$ **.00**

BASIC ANNUAL SALARY/EARNED INCOME

A35. During a typical week on this job, how many hours did you usually work?

NUMBER OF HOURS PER WEEK

A36. Including paid vacation and paid sick leave, upon how many weeks per year was your salary based?

NUMBER OF WEEKS PER YEAR

A37. During the week of April 15, 1999, were you working for pay (or profit) at a second job (or business), including part-time, evening, or weekend work?

1 Yes

2 No → **SKIP to A41, page 6**

A38. (IF YES) What kind of work were you doing at your second job during the week of April 15 — that is, what was your occupation? Please be as specific as possible, including any area of specialization.

IF YOU HAD MORE THAN TWO JOBS THAT WEEK: Answer for the job where you worked the second most hours

A39. Using the JOB CODES LIST (pages 12-13), choose the code that BEST describes the work you were doing on your second job during the week of April 15.

CODE | |

A40. To what extent was your work on this second job related to your (first U.S.) doctoral degree? Was it . . .

Mark (X) ONLY One

1 Closely related

2 Somewhat related

3 Not related

A41. Thinking back now to 1998, was any of your work during 1998 supported by CONTRACTS OR GRANTS from the U.S. government?

0 ← **Mark (X) this box if you did not work in 1998 and SKIP to B1**

FEDERAL EMPLOYEES: Please answer "No"

Mark (X) ONLY One

1 Yes

2 No → **SKIP to A43**

3 Don't know

A42. (IF YES) Which Federal agencies or departments were supporting your work?

Mark (X) all that apply

- 1 Agency for International Development (AID)
- 2 Agriculture Department (USDA)
- 3 Commerce Department (DOC)
- 4 Defense Department (DOD)
- 5 Department of Education (include NCES, OERI, FIPSE, FIRST)
- 6 Energy Department (DOE)
- 7 Environmental Protection Agency (EPA)
- 8 Health and Human Services Department (Excluding NIH)
- 9 Interior Department
- 10 National Aeronautics and Space Administration (NASA)
- 11 National Institutes of Health (NIH)
- 12 National Science Foundation (NSF)
- 13 Transportation Department (DOT)
- 14 Other – Specify ↗

15 DON'T KNOW SOURCE AGENCY

A43. Counting all jobs held in 1998, what was your TOTAL EARNED income for 1998, BEFORE deductions? Include all wages, salaries, bonuses, overtime, commissions, consulting fees, net income from businesses, summertime teaching or research, postdoctoral appointment, or other work associated with scholarships

\$.00

TOTAL 1998 EARNED INCOME

PART B – Past Employment

The next few questions will help us better understand employment changes over time.

B1. Were you working for pay (or profit) during BOTH of these time periods — the week of April 15, 1997 AND the week of April 15, 1999?

IF YOU WERE A STUDENT: Do NOT count financial aid awards with no work requirement

1 Yes

2 No → **SKIP to C1**

B2. (IF YES) During these two time periods — the week of April 15, 1997, and the week of April 15, 1999 — were you working for ...

Mark (X) ONLY One

1 Same employer AND same job → **SKIP to C1**

2 Same employer BUT different job

3 Different employer BUT same job

4 Different employer AND different job

B3. (IF DIFFERENT) Why did you change your employer or your job?

Mark (X) Yes or No for each

- | YES | NO |
|------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------|
| ↓ | ↓ |
| 1. Pay, promotion opportunities . . . | <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> |
| 2. Working conditions (e.g., hours, equipment, working environment) . . . | <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> |

| 6. School-related reasons (e.g., returned to school, completed a degree) . . . | <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> |
| 7. Laid off or job terminated (includes company closings, mergers, buyouts, grant or contract ended) . . . | <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> |
| 8. Retired . . . | <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> |
| 9. Other – Specify ↗ . . . | <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> |

PART C – Other Work and Career Related Experience

C1. During the past year, did you attend any professional society or association meetings or professional conferences? Include regional, national, or international meetings

1 Yes

2 No

C2. To how many national or international professional societies or associations do you currently belong?

Number _____ OR 0 NONE

C3. During the past year, did you attend any WORK-RELATED workshops, seminars, or other work-related training activities? Do NOT include college courses – these will be discussed in PART D

Do NOT include professional meetings unless you attended a special training session conducted at the meeting/conference

- 1 Yes
2 No → **SKIP to D1**

C4. (IF YES) During the past year, in which of the following areas did you attend work-related workshops, seminars, or other work-related training activities?

Mark (X) Yes or No for each

YES NO
↓ ↓

1. Management or supervisor training . . . 1 2
2. Training in your occupational field . . . 1 2
3. General professional training (e.g., public speaking, business writing) . . . 1 2
4. Other work-related training – *Specify ↗* 1 2

C5. For which of the following reasons did you attend training activities during the past year?

Mark (X) Yes or No for each

YES NO
↓ ↓

1. To facilitate a change in your occupational field . . . 1 2
2. To gain FURTHER skills or knowledge in your occupational field . . . 1 2
3. For licensure/certification . . . 1 2
4. To increase opportunities for promotion/advancement/higher salary . . . 1 2
5. To learn skills or knowledge needed for a recently acquired position . . . 1 2
6. Required or expected by employer . . . 1 2
7. Other – *Specify ↗* . . . 1 2

C6. What was your most important reason for attending training activities? Enter number of appropriate reason from C5 above.

MOST IMPORTANT REASON FROM C5

PART D – Background Information

D1. Between April 1997 and April 1999, did you take any college or university courses or enroll in a college or university for other reasons, such as completing another Master's or doctorate?

- 1 Yes
2 No → **SKIP to E1, page 8**

D2. (IF YES) In which college or university department were you primarily taking classes or doing research, etc. (e.g., English, chemistry)?

DEPARTMENT

D3. During that time, toward what degree or certificate, if any, were you (or are you) working?

- 0 ← **Mark (X) this box if no specific degree or certificate and SKIP to D7, page 8**

IF MORE THAN ONE APPLIES: *Mark the highest level*

Mark (X) ONLY One

- 1 Bachelor's degree
2 Post baccalaureate certificate
3 Master's degree (including MBA)
4 Post master's certificate
5 Doctorate (e.g., Ph.D., D.S.C., D.Sc., Ed.D.)
6 Other professional degree (e.g., JD, LLB, ThD, MD, DDS) – *Specify ↗*

- 7 Other – *Specify ↗*

D4. Between April 1997 and April 1999, did you complete a degree or certificate?

- 1 Yes
2 No → **SKIP to D7, page 8**

D4a. (IF YES) What degree or certificate did you receive? Enter number of appropriate TYPE OF DEGREE/CERTIFICATE received from D3 above.

TYPE OF DEGREE/CERTIFICATE FROM D3

D5. In what month and year was this degree or certificate awarded?

IF YOU COMPLETED MORE THAN ONE: Enter the date for the highest degree or certificate awarded

Month Year
 | 19

D6. From which academic institution did you receive this degree or certificate?

School Name

City/Town

State/Foreign Country

D7. What was your primary field of study during that time?

PRIMARY FIELD OF STUDY

D8. For which of the following reasons were you taking classes or enrolled between April 1997 and April 1999?

Mark (X) Yes or No for each

YES NO

1. To gain further education before beginning a career 1 2
2. To prepare for graduate school 1 2
3. To change your academic or occupational field 1 2
4. To gain FURTHER skills or knowledge in your academic or occupational field 1 2
5. For licensure/certification 1 2
6. To increase opportunities for promotion, advancement, or higher salary 1 2
7. Required or expected by employer 1 2
8. For leisure/personal interest 1 2
9. Other – Specify 1 2

D9. Were ANY of your school-related costs for taking college or university courses during this time paid for by an employer?

- 1 Yes
 2 No

PART E – Recent Doctorate Recipients**E1. Did you receive your (first U.S.) doctoral degree at any time between July 1996 and June 1998?**

1 Yes

2 No → **SKIP to F1, page 10**

E2. (IF YES) Between completing your doctorate and the week of April 15, 1999 have you sought or held what you would consider a "career path" job?

A "career path" job is a job that will help further your career plans or is a job in a field where you want to make your career

- 1 Yes, have sought or held a career path job
 2 No, have not sought or held a career path job → **SKIP to E7, page 9**

E3. (IF YES) To what extent, if at all, was your search for a career path job limited by . . .

Mark (X) ONLY One for each item

	A Great Deal	Some-what	Not Much/ Not At All	Not Applicable
1. Family responsibilities	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>
2. Spouse's career or employment	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>
3. Debt burden from undergraduate or graduate degrees	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>
4. Desire to not relocate or move to place of job	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>
5. Suitable job not available	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>
6. Other – Specify <input checked="" type="checkbox"/> ..	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>

E4. Which of the following resources did you use for seeking or finding your first career path job after receiving your doctorate?

If you have not yet obtained a career path job, please indicate the sources used in your job search

Mark (X) Yes or No for each

	YES ↓	NO ↓
1. Faculty or advisors	<input type="checkbox"/> 1	<input type="checkbox"/> 2
2. Professional recruiters such as "head hunters"	<input type="checkbox"/> 1	<input type="checkbox"/> 2
3. College or department placement office	<input type="checkbox"/> 1	<input type="checkbox"/> 2
4. Professional meetings	<input type="checkbox"/> 1	<input type="checkbox"/> 2
5. Electronic postings	<input type="checkbox"/> 1	<input type="checkbox"/> 2
6. Newspapers	<input type="checkbox"/> 1	<input type="checkbox"/> 2
7. Professional journals	<input type="checkbox"/> 1	<input type="checkbox"/> 2
8. Informal channels through colleagues or friends	<input type="checkbox"/> 1	<input type="checkbox"/> 2
9. Direct contacts you initiated with company (e.g., sent unsolicited vita)	<input type="checkbox"/> 1	<input type="checkbox"/> 2
10. Other – Specify ↗	<input type="checkbox"/> 1	<input type="checkbox"/> 2

E5. Which TWO resources in E4 were most responsible for finding your first career path job? Enter number of appropriate resource from E4 above.

0 ← Mark (X) this box if you have not held or accepted a career path job since receiving your doctorate and SKIP to E7

1. MOST important resource

2. SECOND MOST important resource (Enter "0" if no second resource)

E6. How many months elapsed between the time you completed your doctorate and the time you accepted your first career path job?

If your career path job began while you were completing or within one month of receiving your doctoral degree: Enter "0"

NUMBER OF MONTHS

E7. In terms of preparing you for a career, how adequate was your doctoral program or training in each of the following areas?

Mark (X) ONLY One for each item

	Very Adequate ↓	Some-what Adequate ↓	Not Adequate ↓	Not Applicable ↓
1. General problem solving skills	<input type="checkbox"/> 1	<input type="checkbox"/> 2	<input type="checkbox"/> 3	<input type="checkbox"/> 4
2. Subject matter knowledge	<input type="checkbox"/> 1	<input type="checkbox"/> 2	<input type="checkbox"/> 3	<input type="checkbox"/> 4
3. Oral communication skills	<input type="checkbox"/> 1	<input type="checkbox"/> 2	<input type="checkbox"/> 3	<input type="checkbox"/> 4
4. Teaching skills	<input type="checkbox"/> 1	<input type="checkbox"/> 2	<input type="checkbox"/> 3	<input type="checkbox"/> 4
5. Collaboration and team work skills	<input type="checkbox"/> 1	<input type="checkbox"/> 2	<input type="checkbox"/> 3	<input type="checkbox"/> 4
6. Quantitative skills	<input type="checkbox"/> 1	<input type="checkbox"/> 2	<input type="checkbox"/> 3	<input type="checkbox"/> 4
7. Writing skills	<input type="checkbox"/> 1	<input type="checkbox"/> 2	<input type="checkbox"/> 3	<input type="checkbox"/> 4
8. Computer skills	<input type="checkbox"/> 1	<input type="checkbox"/> 2	<input type="checkbox"/> 3	<input type="checkbox"/> 4
9. Research integrity/ethics	<input type="checkbox"/> 1	<input type="checkbox"/> 2	<input type="checkbox"/> 3	<input type="checkbox"/> 4
10. Establishing contacts with colleagues in field	<input type="checkbox"/> 1	<input type="checkbox"/> 2	<input type="checkbox"/> 3	<input type="checkbox"/> 4
11. Management or administrative skills	<input type="checkbox"/> 1	<input type="checkbox"/> 2	<input type="checkbox"/> 3	<input type="checkbox"/> 4

E8. In which TWO areas in E7 would you have liked to have had more training or emphasis in your doctoral program? Enter number of appropriate area from E7 above.

0 ← Mark (X) this box if none (no additional training or emphasis desired)

1. FIRST area

2. SECOND area (Enter "0" if no second area)

E9. Overall, how satisfied are you with the doctoral program you completed?

Mark (X) ONLY One

- 1 Very satisfied
- 2 Somewhat satisfied
- 3 Somewhat dissatisfied
- 4 Very dissatisfied

PART F – Demographic Information

F1. As of the week of April 15, 1999 were you . . .

Mark (X) ONLY One

- 1 Married
- 2 Widowed
- 3 Separated
- 4 Divorced
- 5 Never Married

SKIP to F4

F2. (IF MARRIED) During the week of April 15, was your spouse working for pay (or profit) at a full-time or part-time job?

- 1 Yes, full-time
- 2 Yes, part-time
- 3 No → **SKIP to F4**

F3. (IF YES) Did your spouse's duties on this job require the technical expertise of a bachelor's degree or higher in . . .

Mark (X) Yes or No for each

- | | YES | NO |
|----------------------------------------------------------------------|--------------------------|--------------------------|
| 1. Engineering, computer science, math or the natural sciences . . . | <input type="checkbox"/> | <input type="checkbox"/> |
| 2. The social sciences . . . | <input type="checkbox"/> | <input type="checkbox"/> |
| 3. Some other field (e.g., health or business) – Specify ↗ . . . | <input type="checkbox"/> | <input type="checkbox"/> |

F4. During the week of April 15, did you have any children living with you as part of your family?

Only count children who lived with you at least 50 percent of the time

- 1 Yes → **GO to F5**
- 2 No → **SKIP to F6**

F5. (IF YES) How many of these children living with you as part of your family were . . .

IF NO CHILDREN IN A CATEGORY: Enter "0"

Number of Children

1. Under age 2 . . .

2. Aged 2 – 5 . . .

3. Aged 6 – 11 . . .

4. Aged 12 – 17 . . .

5. Aged 18 or older . . .

F6. During the week of April 15, 1999, were you living in the United States or one of its territories, or were you living in another country?

- 1 United States or one of its territories
- 2 Another country

F7. As of the week of April 15, 1999, were you a . . .

Mark (X) ONLY One

U.S. Citizen

- 1 Native born
- 2 Naturalized

→ **SKIP to F9**

Non-U.S. Citizen

- 3 With a Permanent U.S. Resident Visa
- 4 With a Temporary U.S. Resident Visa
- 5 Living outside the United States

F8. (IF NON-U.S. CITIZEN) Of which country are you a citizen?

COUNTRY

F9. What is your birthdate?

Month	Day	Year
<input type="text"/>	<input type="text"/>	<input type="text"/>

19

The next question is designed to help us better understand the career paths of individuals with different physical abilities.

F10. What is the USUAL degree of difficulty you have with . . .

	MARK (X) ONE FOR EACH				
	None	Slight	Moderate	Severe	Unable to Do
1. SEEING words or letters in ordinary newsprint (with glasses/contact lenses if you usually wear them)	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>
2. HEARING what is normally said in conversation with another person (with hearing aid, if you usually wear one)	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>
3. WALKING without human or mechanical assistance or using stairs	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>
4. LIFTING or carrying something as heavy as 10 pounds, such as a bag of groceries	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>
